NEW ZEALANDS' FIRST AND ONLY NQZA APPROVED & ACCREDITED LASER, IPL AND TATTOO REMOVAL CERTIFICATION

HELLO AND WELCOME!

NZ Laser Training was established in 2011 after recognising the industry needed an independent and expert education provider for cosmetic Laser and IPL (pulsed light). As an impartial consultant to local councils, the Ministry of Health and the Health and Disability Commissioner (HDC)- my goal has always been to ensure laser safety and best practice is upheld, protecting the public and ensuring operators of laser and IPL devices receive world leading state-of-the-art training and support to flourish in their professional careers.

I have created engaging educational programmes to ensure our learners become compliant in industry regulations, and work to industry best practice standards, as well as gaining the highest level of education on offer, not only in New Zealand, but internationally. Our educational programmes are designed and suitable for: newly qualified beauty therapists, and those already working in the beauty aesthetic and laser industry; including medical practitioners, and tattooists seeking to train in laser tattoo removal.

Learn laser science and laser safety as well as understand the science behind emerging technologies, and undertake training in practical applications of lasers and pulsed light (IPL) devices. Our Laser safety programmes assist with developing and maintaining safe workplace practices and include laser safety online certification and laser health safety officer certifications.

My team and I look forward to helping you become a professional industry Laser and IPL operator!

OUR EVOLUTION

In Mid-2020, NZ Laser Training partnered up with Evolution school of beauty, massage and spa (Whangarei) to apply to NZQA for a new form of approved programme called a Micro-credential. As a category 1 private training provider (PTE), Evolution school upholds one the best and reputable beauty training programmes in New Zealand, with a view to expand their scope of training delivery into the NZ market, and NZLT being already the leading trainer provider in this specialty area, it was a perfect synergy for the two to combine forces. As exclusive providers to Evolution School of Beauty Massage and Spa, we will take care of all your Laser and IPL educational needs and can support your learning with access to our skilled tutors who are all qualified adult tutors with vast and relevant clinical expertise.

YOUR GOAL OF BECOMING A LASER TECHNICIAN CAN BE ACHIEVED WITH US!

To become a laser technician you need to understand complex laser science as it relates to the various devices used, and how they are applied to the skin, and you will need to be aware that when you change settings, you affect the outcome for the client. It takes a long time to become proficient when you can only access snippets of training, and limited hands on practical - that's where we come in! NZ Laser Training has overcome this by encompassing more than nine years of teaching laser experience specifically in laser and intense pulsed light, now with the NZQA approved Microcredential, we can also support your career goals to become a formally certified technician, with the assistance of fees free, and by giving you access to a longer more comprehensive programme delivered over 16 weeks.

EXCITING INDUSTRY NEWS – JULY 2020!

It can be tricky to find the time to commit to a longer field of study or to manage the practicalities of travelling to Australia or the USA to complete formal studies in Laser / IPL.

You can now access quality Laser / IPL education via the new NZQA approved Micro-credential with us – we would be delighted to host you as our valued learner!

A micro-credential is a shorter, bite-sized learning achievement that became a recognised part of New Zealand's qualifications

system in 2017/2018 when it was piloted in the trade sector.

Now approved and fully running, NZ Laser Training is launching its formal Micro-credential with enrolments starting from September 1st 2020.

“Micro credentials are a brilliant and innovative framework, and NZ Laser Training is delighted to be able to service industry after many years of lobbying for regulations and industry best practice” – Ruth, NZ Laser Training.

INTRODUCING THE NEW 16-WEEK NZQA APPROVED CERTIFICATION

NZQA Approved and Accredited: Cosmetic Lasers and Intense Light Source Therapies (Micro-credential)

Level 6

Pre-requisites apply – please check these out over the page

Enrolment in the NZQA Micro Credential Programme can take 4-6 weeks. The 2020 intake deadline is 28 July 2020.

400 hours of learning to be completed over 16 weeks

The aim of this new Micro-credential is to provide learners with specialised Intense Pulsed Light (IPL) and Cosmetic Laser skills. We want industry to possess knowledge so they can critically lead, manage, analyse and evaluate clients' needs, and to manage specialised IPL and Laser therapy treatments relating to Hair Removal, Skin Rejuvenation and Tattoo Removal.

On completion of this 16-week course learners will have skills and knowledge to operate in a professional and safe manner (including compliance with relevant legal, insurance, health, safety and hygiene obligations).

The curriculum has been spearheaded by our Course Director (Ruth Nicholson) a qualified adult educator with 16 years industry experience including more than nine years specialising in teaching laser science and safety to beauty and medical professionals to date. Ruth is supported by a team of industry leading content experts, certified Adult Educators (both in NZ and Internationally) with moderation and support by Phds, GPs with specialities in skin cancers and other subject matter experts.

278 hours online studies

Using a world leading, state-of-art learning portal
